Philosophy

We believe that co-curricular activities are integral part of the total educational process. Through participation in these opportunities, students can have experiences and training in events not ordinarily obtainable in the general curriculum. Policies have been developed and are implemented to cultivate the high ideals of good citizenship, community involvement and personal growth. We consider involvement in co-curricular activities a privilege. Students participation carries with it certain responsibilities and expectations which promote growth toward becoming a responsible member of society. We expect students to be a credit to themselves, their family, school, and community.
